

Services Menu for Therapy

Speech Therapy - ½ hour service in house

Our Speech-Language therapy services are designed for an individual plan of care to address each child's specific need. Our therapists provide services for a diagnostic testing and therapy for children with speech, language and communication disorders.

Occupational Therapy - ½ hour service in house

Occupational therapy helps children to strengthen the coordination between the brain and the body to enhance the function of daily tasks. OT benefits children with learning and behavioral disorders or challenges caused by brain trauma, stroke or a physical injury.

Physical Therapy - ½ hour service in house

PT works to improve child's gross motor functioning, focus is on strength, balance and coordination in relation to gross motor movements. Our therapy service is designed to help children achieve a functional motor level that prepares them for every day environment.
